Red Danish Milkcow on old danish manor known from year 1200, about

## The budget priorities of the European Union (EU) for the next 7 year period (2021-2027)

**“For tens of years, enthusiastic breeders, farmers and others in the EU have taken care of old breed savings, mostly on their own spending. According to the UN and other international declarations, this is crucial for maintaining agrobiodiversity and a sustainable agricultural system. Time has come for EU to take responsibility and properly support the skilled farmers that safeguard the future of our food, agriculture and ecosystem by saving old breeds directly. In the huge amount of money set aside for farming matters in the EU, there should be a part that can go to old breed farmers. Because in the end, they deliver much more than only food.”**

Thanks again, and I will keep you informed about when your message will be published.

Kind regards,

**Margot Vanhecke**  
Junior Policy Officer

# WE NEED YOUR VOICE!

**JOIN US**  
FOR A  
**SUSTAINABLE  
EU BUDGET**

"The budget priorities of the European Union (EU) for the next 7 year period (2021-2027) are currently under negotiation. This will determine the policy priorities and funding opportunities of the following financial period. In previous budgets, there have been many incoherencies, such as stating the will to halt biodiversity loss by 2020 while subsidizing industrial farms; or investing public money in the protection of a natural area but then fund the construction of a highway throughout it."

This spending regime is irrational and inefficient and, as citizens and tax payers, we cannot let it happen again! Thus, join us in the fight for a consistent and sustainable EU budget! Share your Citizen Message and let your voice be heard!"

**WE NEED YOUR VOICE!**

Write a short message (50-100 words) on why you think the EU should spend its budget sustainably and send it to [sustainability@ceeweb.org](mailto:sustainability@ceeweb.org)

You can check some examples [here](#).

# **Dear new secretary of agriculture in Denmark**

## **June 2019**

**“Underskudsdekning i henhold til videnskabelige beregninger for drift af bevaringslandbrug med dyrehold, i sammenligning med den øvrige landbrugsdrift i Danmark – en certificeret bevaringsbonde skal være ligestillet økonomisk med enhver anden faglig uddannet bonde i Danmark.”**

**Loss cover according to scientific calculations for the operation of conservation agriculture with animal husbandry, in comparison with the other agricultural operations in Denmark - a certified conservation farmer must be economically equivalent to any other professionally trained farmer in Denmark.**

## It is not a question of money, rather a question of cognition

For EU and its nations – In EU itself – it is not a question of money, rather a question of cognition – know about, acknowledgment.

The amount of money spend on agricultural matters is so big, you wouldn't imagine it, I think – ask experts! The part needed, which we ask for to be spend - on supporting breeders of old livestock breeds and growing old sort of plants sufficiently, it is just a tiny, tiny part of it all – but for the breeders, it is a decisive support concerning the future of old breeds.

Thanks so much for listening! We need your voice too!

Have a look at the rare
